

ENVIRONMENTAL POLICY

Gulermak Steel Construction Ind. & Trade Inc.

We respect our earth whilst striving for the highest technology in our Works

We believe that respect for the environment is an integral part of our business. We are aware of our possible impact on the global environment and we are committed to planning and executing all work processes with the lowest possible imprint on the environment.

We focus on minimizing energy and water consumption and the amount of waste to avoid waste generation and excess consumption of materials. We work closely with our customers on the individual projects to include environmental measures and procedures from the concept design phase through to project handover, to minimize the environmental impact.

We comply with laws and agreements

Compliance with applicable laws, regulations and mutual agreements are fundamental preconditions for the way we work. We are committed to meeting compliance obligations and comply with internationally accepted guidelines to reduce our impact on the global environment.

We demonstrate environmental considerations

We are committed to achieving high environmental standards, doing the necessary works to prevent pollution, to reduce our impact on the environment, to protect the environment by combating greenhouse gases, harmful emissions and climate change and by expanding the activities for the efficient use of energy both in the planning and design phase and in execution technique.

We all hold responsibility for the environment

We make sure that all our employees are aware of environmental issues and involved in environmental activities with priority to protecting the environment on both a short and long-term basis.

We Commit to Continuous Improvement

We are committed to the continuous improvement of the environmental management system to increase environmental performance.
