

ENERGY POLICY

All employees, including Gülermak Steel Construction Industry and Trade Inc. top management, are committed to increasing energy efficiency by continuously improving energy performance and making our activities and services environmentally and economically sustainable.

In this context, our basic principles regarding energy are as follows:

- We are committed to providing all the necessary information and resources to achieve our goals and objectives.
- We are committed to ensuring full compliance with the applicable legal terms and requirements that we are obliged to comply with regarding energy use and efficiency.
- We are committed to developing and continuing all activities carried out to continuously improve energy performance and EnMS and increase energy efficiency.
- We support the purchase of environmentally friendly and energy-saving products and services to increase energy efficiency.
- We support the consideration of energy performance improvement in design activities.
- We inform all our employees about energy efficiency through various communication tools and necessary training to ensure that our energy policy and goals are adopted.
- We develop supporting projects to improve energy performance and implement these projects.
- We ensure the continuity of the system by systematically monitoring and documenting the results of the created system and announcing them to all units of the company.
